CS 290 – Project Proposal

For the website I would like to build this term, I would like to use the theme of the Legend of Zelda Timeline. The requirements for this page state that the website should have 1 homepage and at least 3 subpages. For my homepage, I plan on presenting the timeline before/after the timeline splits. I would also like to have a simple short survey, that asks the user for their personal favorite games in each of the diverging timelines. This will be a post request that sends to the provided link. At the bottom of the survey, I will include a scrolling comment box. The project also requires that we have a carousel animation. I plan on placing my carousel animation at the top of the homepage (similar to the www.nbc.com example). This animation will cycle through the names/artwork from various Legend of Zelda games that are outside of the timeline split (both before and after). Below the carousel animation, there will be an option for the user to click on three subpage links which will correspond to the different timeline splits in the Legend of Zelda series. Those timeline splits would consist of the 'Hero Defeated' timeline, 'Hero Triumphant; Child Era' timeline, and the 'Hero Triumphant; Adult Era' timeline. Each of these subpages will have a list of the Legend of Zelda games that fall into that specific timeline. I would like to have artwork and a brief synopsis of each of the games below the artwork and title. The project also requires us to create a button that downloads files after the user presses it. I was thinking of having a button on the homepage that the user can click which will download an image of the official Legend of Zelda timeline. The download image will be similar to the image found here: <https://imgur.com/di7SWd1>. Below this button, I will also provide a link that will lead to a website where the user can buy the official 'Hyrule Historia' which has all sorts of information about the Legend of Zelda including the official timeline.

The layout of the homepage will be similar to the pictures found in the 'Stand-Alone Promotional Website' section of this website: <https://blog.prototypr.io/4-ideas-for-creating-a-smashing-game-website-3d79b4369ff>.
